

For setting up your account with Outlook Express, perform the following steps:

1. Click on the Tools item in the Menu and select Accounts.

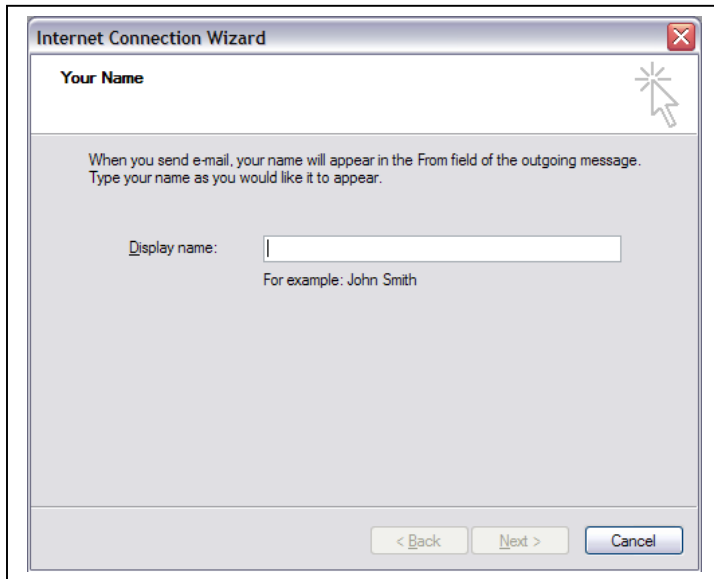

2. Click on the Mail tab

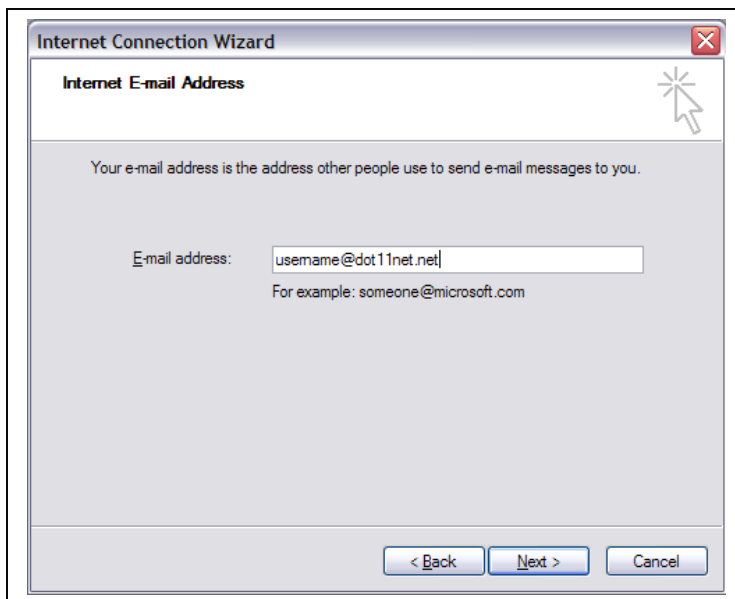

3. Click the Add button, and select Mail

4. Input your information into the Add Mail Wizard. First it will ask for your name. This is the name you want people to see when they get a mail message from you. When you are finished, click Next.

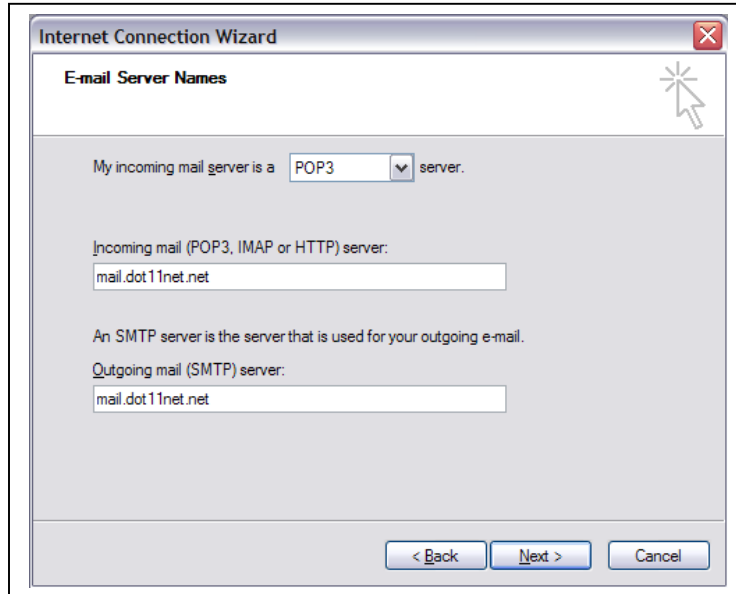

The screenshot shows a window titled "Internet Connection Wizard" with a close button in the top right corner. The main heading is "Your Name". Below the heading is a text box with the instruction: "When you send e-mail, your name will appear in the From field of the outgoing message. Type your name as you would like it to appear." There is a text input field labeled "Display name:" with a cursor inside. Below the field is the example text "For example: John Smith". At the bottom of the window are three buttons: "< Back", "Next >", and "Cancel".

5. Now input your e-mail address that you want to use to send and receive mail. This will be in the form of [username@dot11net.net](#) or [username@burlesonbroadband.com](#), etc. Click Next when you are done.

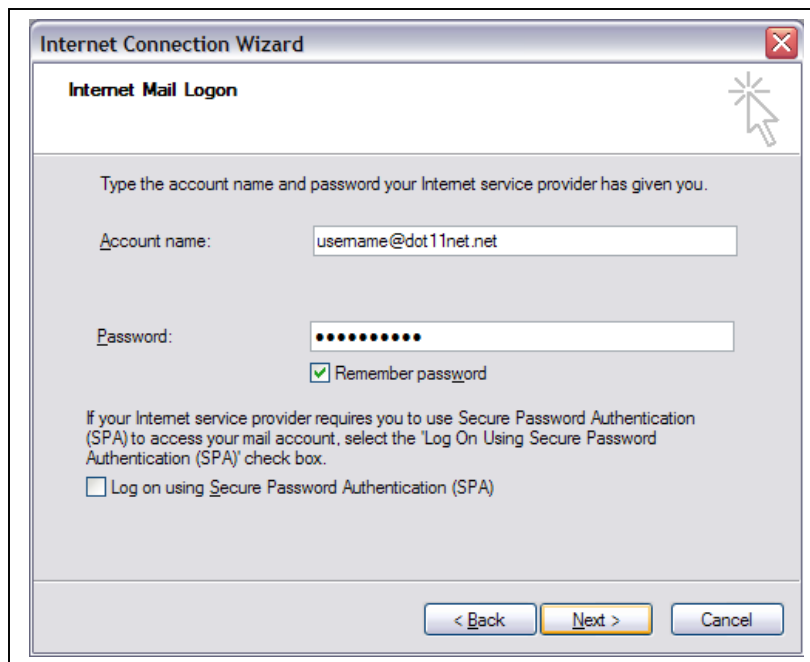

The screenshot shows a window titled "Internet Connection Wizard" with a close button in the top right corner. The main heading is "Internet E-mail Address". Below the heading is a text box with the instruction: "Your e-mail address is the address other people use to send e-mail messages to you." There is a text input field labeled "E-mail address:" containing the text "username@dot11net.net". Below the field is the example text "For example: someone@microsoft.com". At the bottom of the window are three buttons: "< Back", "Next >", and "Cancel".

6. Fill in the server information. Regardless of which domain you have chosen to for our dot11 service (dot11net.net, burlesonbroadband.com, crowleybroadband.com, or joshuabroadband.com) the mail servers need to both be **mail.dot11net.net**. The server is a POP3 server. Click Next when complete.

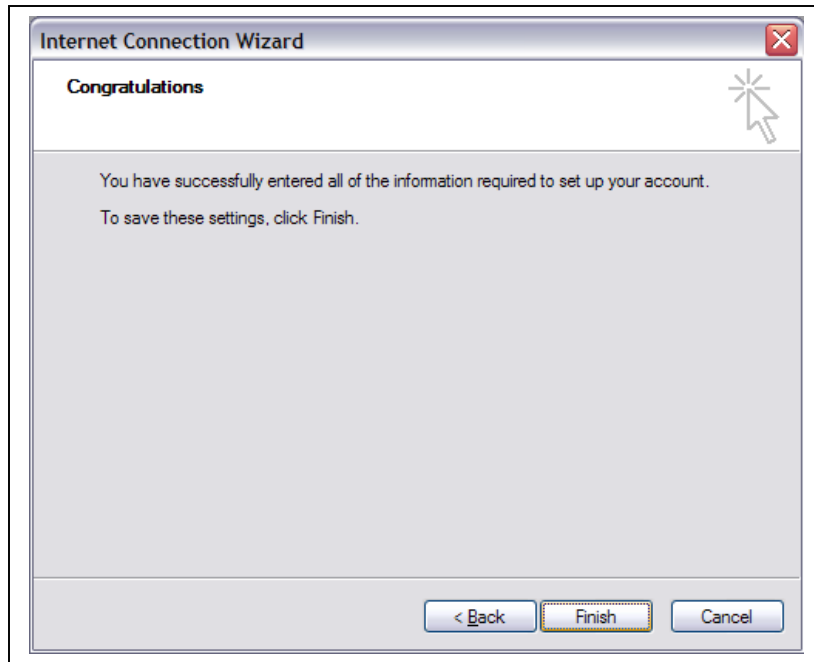

The screenshot shows the 'Internet Connection Wizard' window with the 'E-mail Server Names' step. The window title is 'Internet Connection Wizard'. The main heading is 'E-mail Server Names'. Below the heading, it says 'My incoming mail server is a POP3 server.' The 'Incoming mail (POP3, IMAP or HTTP) server:' field contains 'mail.dot11net.net'. Below that, it says 'An SMTP server is the server that is used for your outgoing e-mail.' The 'Outgoing mail (SMTP) server:' field also contains 'mail.dot11net.net'. At the bottom, there are three buttons: '< Back', 'Next >', and 'Cancel'. A mouse cursor is pointing at the 'Next >' button.

7. Fill in the username and password. PLEASE NOTE: YOUR USERNAME IS YOUR **FULL E-MAIL ADDRESS**. Click Next when complete.

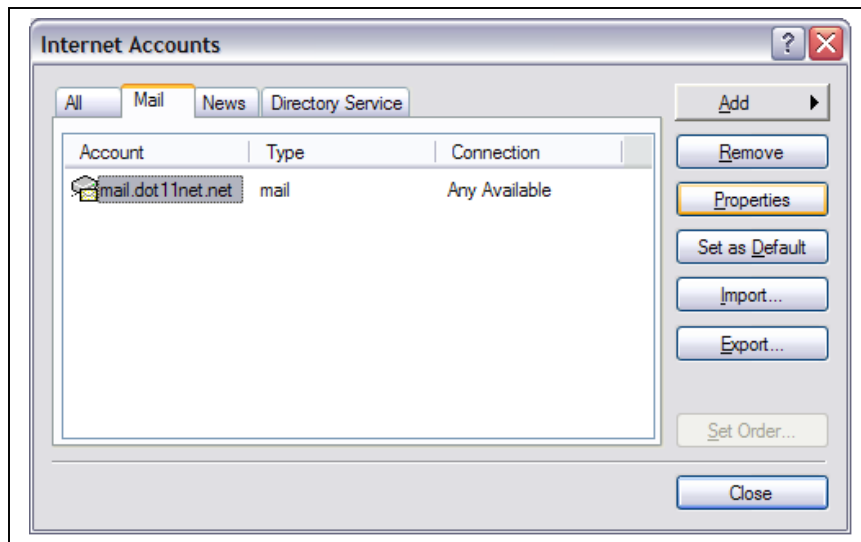

The screenshot shows the 'Internet Connection Wizard' window with the 'Internet Mail Logon' step. The window title is 'Internet Connection Wizard'. The main heading is 'Internet Mail Logon'. Below the heading, it says 'Type the account name and password your Internet service provider has given you.' The 'Account name:' field contains 'username@dot11net.net'. The 'Password:' field contains a series of dots. Below the password field, there is a checked checkbox labeled 'Remember password'. Below that, it says 'If your Internet service provider requires you to use Secure Password Authentication (SPA) to access your mail account, select the 'Log On Using Secure Password Authentication (SPA)' check box.' There is an unchecked checkbox labeled 'Log on using Secure Password Authentication (SPA)'. At the bottom, there are three buttons: '< Back', 'Next >', and 'Cancel'. The 'Next >' button is highlighted with a yellow border, and a mouse cursor is pointing at it.

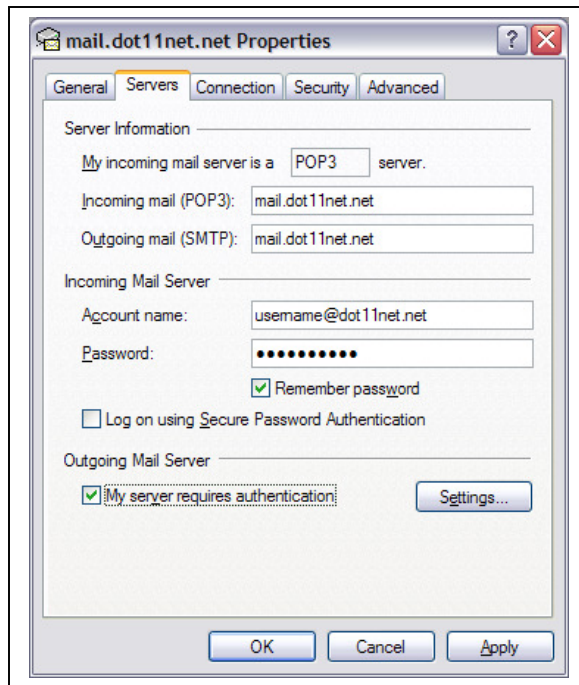

8. Click on the Finish Button.

9. Now highlight the account you just created under the Mail Tab and click the Properties button.

10. Select the Servers Tab and at the very bottom, under the Outgoing Mail Server section, check the box which says, “My server requires authentication.” Click OK when complete.

11. Click Close on the Accounts Window. Congratulations! You are now ready to use your new email account. Click the Send/Receive button and you will start downloading email.
